Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim 19, 24 – 25, 30 – 31, 36 – 37, 41, 43 and 46 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18, 20, 22,23, 26, 27, 34, 35, 38, 39,40,42 and 44 are rejected under 35 U.S.C. 102(b) as being anticipated by Tarr.

Tarr teaches two pumps feeding linked (153) or an unlinked rails for a six-cylinder engine. The pumps are definitely triggered opposite to one another in at least one embodiment (column 13, lines 28 – 33). While it seems clear that the signal can be one signal the use of two signals is also possible so the claims requiring this limitation have not been rejected as anticipated.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21, 28-29, 32-33, 45 and 47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tarr in view of Isozumi.

Tarr applies as noted above and Isozumi uses the same time signal to drive a pair of pumps feeding a common rail, thereby making this an obvious way to control the spill valves of Tarr.

Claim 48 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tarr in view of Kawachi.

Tarr applies as noted above and Kawachi teaches a common rail system which uses a read only memory to control the spill on the pump feeding the rail, thereby making this an obvious way to store the control settings for Tarr.

Finally, applicant's traverse of the restriction has been considered but the prosecution of two different flow techniques in the case would present a major burden on the examiner.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication should be directed to Carl Miller at telephone number 703-308-2653.
